"A BUSINESS MODEL SO EXCLUSIVE

EVEN OUR
COMPETITION
WANTS IN"

best businesses

When The Janitorial Agency first opened their doors they had no idea that the competition they were up against would one day be asking them for advice. So what makes them so unique? The Janitorial Agency (TJA) offers an unprecedented business model and has set a new standard for professionalism in the commercial cleaning industry. They are recognized as a major force in the industry and have consistently earned outstanding recognition in the face of their competitors. "It's amazing how fast we've grown and I know it's due to the passion we all have for this business model" comments Dan Carey, CEO and Co-Founder of The Janitorial Agency. With nationwide profit territories and being number one in operations and marketing support, it is easy to see why The Janitorial Agency is quickly becoming the fastest growing business opportunity in North America.

TJA offers three different investment level options ranging from a start-up business program to master franchise opportunities. One option of investment is the partner program which grants you the luxury of owning your own business without the hassle of being a franchisee; this means no hidden costs for you. With very little investment, TJA's partner program is the easiest way to give you the business independence you are looking for. Once enrolled in the partner program you have the option of becoming a Designated Licensed Agent (DLA). DLA's are qualified agents who adopt the habits and professionalism of corporate office personnel and operate as an extension of TJA. Unlike your typical cleaning job, DLA's get the benefit of your traditional nine to five workdays. TJA also offers two higher investment franchise opportunities. One option is a partial franchise which is similar to the DLA program. The main difference is that the partial franchisee obtains more profit and ownership than a Designated

Licensed Agent. The master franchise program mirrors The Janitorial Agency's entire operation and therefore obtains similar rights and profits as corporate. Within their area of contractual choice, master franchises develop, own and operate every part of TJA corporate, the partners, DLA(s) and partial franchisee(s).

By investing in The Janitorial Agency, you are not only gaining a great business model, you are also coming into a \$130+ billion dollar industry that is recession resistant. As long as there are office complexes, retail shopping centers, medical facilities and other commercial buildings there will always be a need for quality-minded cleaning professionals, regardless of economic conditions. Due to the excessive amount of high turnover with commercial cleaning companies, the market is ready for the type of business model that TJA has developed. TJA corporate is proof that this model is built for success. Dan Carey passionately remarks that "Because of our business model's success, we now have 30 employees and over 700 companies who have taken advantage of this business opportunity."

No matter what level of investment you choose, everyone in The Janitorial Agency's network is given the best tools for success.
